# About Us

## **Lamexon Energy Solutions**

is a top-notch energy Company based in Kenya that provides one-stop renewable and clean energy solutions in East Africa

**Vision:-** To be a leading renewable energy solutions provider in Africa, thereby catalyze community transformation.

**Mission:-** Provide affordable, reliable, clean energy for you.

**Core Values**

- ✓ Excellence and Professionalism
- ✓ Integrity
- ✓ Creativity and Innovation
- ✓ Teamwork

# Our Energy Solutions

01

## ENERGY ADVISORY & CONSULTING

We support you to assess, monitor & analyse your energy utilisation so as to optimise your energy source combination to achieve the desired mix for cost reduction and/or 'green' energy goals.

02

## SOLAR ENERGY

The sun is the largest source of energy in the world. We support our clients to tap into this available source of energy and convert it into usable power.

03

## BIOENERGY

Renewable bioenergy can contribute to a more secure, sustainable, and economically sound future. We support our clients to convert biowaste into bioenergy.

# Our Solar Solutions

## Solar for Home

Solar for residential use seeks to provide power where there is no access to the grid, offering back up power and reducing electricity costs.

## Solar for Biz

Solar for biz offers the dual benefits of cost savings and backup power systems. It can either include battery (to provide backup power) or batteryless (Grid-Tied) to lower your cost of power

## Solar for Water

Solar PV systems are commonly used for water pumping, serving purposes such as domestic use, irrigation, or commercial applications.

# Simple Steps To Our Solutions

**Engineering  
Excellence**

**Innovation  
at its Core**

**Catalyst for a  
Greener Future**

**WHY  
US?**

**Holistic Solutions,  
Holistic Living**

**Reputation and  
Trustworthiness**

**Exceptional Quality  
and Reliability**

# Some Of Our Past Projects
